Keyboard Modules

The modules with 32 to 128
programmable keys

Description

No matter if you use one of these modules as part of a larger TouchMe system or if you use it as stand-alone device - The flexibility is it's strength!

What makes it so special?

- All keyboard modules are equipped with Cherry's MX mechanical keyswitches.
- The key positions can be fitted with single, double and quadruple keycaps.
- The metal supporting plate improves the mechanical strength of the whole construction and acts as an effective shield against electromagnetic noise.
- The connection of the keyboard to other modules is internal, so no exessive cables can be seen.

The keyboard can be adapted to your requirement with the help of the ChangeMe software.

- The software automatically recognises the configuration of the hardware.
- Each key can be programmed on up to 4 levels.
- The keys can be programmed as single-, double- or quadruple keys.
- The keys can be programmed to emmit single keystrokes, strings or even macros, where several keys are Pressed simutainously.
- Special features as an audible beep, autorepeat and pauses can be seperately assigned to each key and level.
- When the layout is finished, a page can be printed out with the finished lables.
- All modern Windows versions from Windows 95 are supported.

Specification

Mechanical data

Housing:	Table-top housing
Housing:	Plastic
Degree of Protection:	IP40
Color:	anthracite
Dimensions:	100 or 253 or 176 or 329 x 222 x 42 mm

Keys

Key Technology:	Cherry MX-Key
Number of Keys:	32 or 96 or 64 or 128
Keyboard Layout:	free
Operational Life:	50 mio. keystrokes min.
Key Legend:	relegenable

Order No.	Article	
KP1168	TM-KMX032A	Modul with 32 programmable keys
KP1171	TM-KMX064A	Modul with 32 programmable keys
