

## Multi-cultural Input - Foreign Language Keyboards

Different country-specific layouts available in short or long travel technologies.

### Description

### Applications:

All membrane keyboards of KFT and GFK series as well as different long travel keyboards are now available as bilingual versions.

Whether arabian or cyrillic, latin or US - the keyboards are provided with the complete set of symbols and characters of the appropriate language. The long travel keyboards are especially useful for applications in international companies as well as for typing pools and for bilingual inputs. The membrane keyboards are specifically designed for demanding industrial environments.

### Specials:

- The arrangement of the characters is based on the layout of the standard keyboard of the desired language.
- The keyboards are available for both unilingual or bilingual input.
- The membrane keyboards can be delivered optionally with [Touchpad](#) or optical [Trackball](#). They offer waterproof input in accordance with IP68.
- The language of the keyboard can easily be switched over by the system manager of your computer.
- The keyboards are equipped with [PS/2](#) or [USB](#) (with adapter) connection.

Here are the country-specific keyboards available:

DE - German  
AR- Arabian  
BE - Belgian  
CH - Swiss
