

Really Cool Backlit - Robust

IP68 Silicone Keyboard

Waterproof Keyboard, easy to clean.

Description

Backlit keyboards are ideal for low-light environments. Because the keyboards are constructed with the lights inside, they do not interfere with the integrity of the sealed seamless surface. We added backlight as a feature to our Really Cool keyboards.

Each key has at least one light embedded under it. The brightness can be adjusted to three different levels for a variety of lighting conditions. We finally added the Swiss/Luxemburger layout to our list of available language options.

Features

- Sealed silicone [Design](#) for dust-free, contaminant-free and waterresistant use in DIN [IP 68](#) (prooved according to directive EN 60601) - Please note certificate below
