

The Monitor Module

The heart of the TouchMe concept

Description

Even though it is possible to use the keyboard modules without the monitor, the display serves as a great centerpiece of an all 'round input/output solution.

This module incorporates 4 user interfaces into one:

- The monitor itself is a 12.1" display with a resolution of 800x600 pixels.
- The optionally integrated touch panel can sometimes replace the mouse and keyboard, saving lots of space.
- There is also a model without a touch panel, which is suitable for applications where the touch is not required. The module has the same technical characteristics as the touch module, except that the touch screen is replaced with a glass plate, which protects the LCD from mechanical damage.
- The 16 optional membrane keys are freely programmable on up to 4 levels and can be changed in colour on request to comply to special customer's demands.
- The integrated stereo speakers and the microphone transform the monitor into a real multimedia interface.

8 LED indicators are integrated to show the status of:

- Power
- Caps/Num/Scroll lock
- The 4 levels of the programmable keys.

Applications:

There is a multitude of applications where the monitor can be used either on its own or teamed up with another TouchMe module:

- As Point-of-Information interface.
- As terminal in hospitality environments
- In industrial controls environments
-

Specification**Mechanical data**

Housing:	Plastic
Degree of Protection:	IP40
Color:	anthracite
Dimensions:	390 x 222 x 95 mm

Additional Information

Resolution of the display:	800x600 pixels
Brightness:	180 cd/m2
Displayed colours:	262,000
Power of stereo speakers:	2 x 1 W(max)
Power supply required:	12V, 25W

Order Information

The sets listed below already include the required controller, power supply, end pieces and connector cables

Order No.	Article	
FP1000	TM-TV0-00-Set	Basic Monitor Set
FP1002	TM-TV0-10-Set	Monitor Set with 16 keys
FP1001	TM-TVR-00-Set	Monitor set including touch
FP1003	TM-TVR-10-Set	Monitor Set with touch and 16 keys
