

X-key-46 with Joystick or Jog Shuttle

Freely programmable keyboard with Joystick or Jog Shuttle and Backlighting

Description

Complex and repetitive keyboard tasks can be reduced to a single keystroke. This means an assistance to the user as well as an increasing productivity.

The keyboard is freely programmable. It can be customized according to the key assignment as well as color and grouping of the keys. The X-Key-46 is available with joystick or jog shuttle. The integrated backlighting enables the user to work even in darkened environments.

Features

- Each of the 46 keys can be customized individually. Colored keycaps as well as the grouping of several keys to only one key is possible.
- Mouse commands (click, scroll, cursor movement) may also be programmed.
- Adjustable back-lighting makes key legends readable even in low light working environments.
- With [USB](#) interface, it is MAC-compatible.
